

I play for several VIP Care doctor offices. When you see a VIP Care listing on my calendar, go to the button for “What’s New!” button and click on it. Click “Non-Dance Musical Event”. These are places where I will be playing music that you can line dance or freestyle too, if the patient waiting area is big enough and most of them are. They only except Medicare clients that are 65 an up. They will show you what the doctor’s office can provide you. They will have some sort of food and drinks.
